Ultimate X Sounds presents new collection of sounds " Drone X Sounds Vol.1 " for the Access Virus TI.

DRON X SOUNDS Vol.1 is is a modern cinematic library set of totally new, ambient abstract sounds for Access Virus TI / TI2/ SNOW / POLAR.

The collection of ambient drones, dark atmospheres, climate pads, darkness and distortion for creating soundscapes, atmospheres.

DRONE X SOUNDS Vol.1 is a particularly inspiring collection for the Film Composing, Video Games, Sound Design, Documentaries, Media Trailers, Commercials, and Contemporary Cinematic and Ambient Songwriting.

This soundset will gives you freedom to create instant cinematic moods, atmospheres and dramatic textures in seconds.

The key element of the library is the creation of unique abstract synth sounds.

In contrast to the other wave samples libraries these sounds can be 100% controlled "on fly".

DXS Vol.1 features **128 patches**. Many of the patches are flexible and you can shift/morph between 2 sounds - OSC balance **the full text can be found in the purchased soundbank package -**

More about

I worked a long time on this project and today i'm proud to present the new and original sound-art concept. Once again I'm pushing the boundaries of possibility.

There is no sounds recreations which is an advantage over other libraries.

Samples can be great but sometimes we lack control over them.

Abstract patches

Characteristic sound created in real time can be different.

In contrast to the previously recorded wave samples libraries, by changing the tone you can get a different result/sound. It is big advantage of this abstract Virus TI soundbank.

Drone X Sounds Vol.1 patches are based on the work of extreme OSC values.

WHAT THE PRESETS ARE ?

Presets do not contain sampled audio (melodic or otherwise) but rather 'data' (synthesizer programs) that can be loaded using the Access Virus TI synthesizer. A collection of presets are collectively referred to as a bank
